

# End of Maintenance (EOM) and End of Life (EOL) Components

Once a component or feature reaches **End of Maintenance (EOM)** status, it will remain accessible and functional but will no longer receive updates or active support from Dizzion. Customers are encouraged to migrate to a supported version as soon as possible. Documentation will still be available but will be de-prioritized in favor of newer version information, with clear warnings indicating the EOM status.

When a component or feature reaches **End of Life (EOL)** status, it will no longer be supported or maintained by Dizzion. EOL components or features may become inoperative or completely inaccessible within the Frame tenant or Horizon environment. Customers are responsible for discontinuing the use of these components or features before the designated EOL date.

All **End of Maintenance (EOM)** and **End of Life (EOL)** dates for key Frame components and features are posted below. Please note that these dates are subject to change at any time.

Name	Version	Infrastructure	End of Maintenance	End of Life	Details
Frame Launchpad	Legacy		-	06/30/2025	The new Launchpad experience will be deployed in two waves on May 18, 2025 and June 1, 2025 as part of our scheduled platform releases.
