Should I optimize my Windows Image?

Yes, most of the times optimizing Windows Image is a good practice. Disabling Scheduled Tasks, Services, (Store) Apps that aren’t used or impacting performance and stability. There also is a downside of optimizing the image, if you optimize too much it can also break functionality in the Operating System or Applications. There is a thin line and some art in optimizing. Advise is start first without optimizing, validate the experience and functionality of the DaaS and Cloud PC solution. Then Step-by-Step optimize the image.
